## Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## DETAILED ACTION

### *Claim Objections*

Claim 26 is objected to because of the following informalities:

- Line 1: "stiction"; should be --friction--

Appropriate correction is required.

### *Claim Rejections - 35 USC § 103*

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 25 and 26 are rejected under 35 U.S.C. 103(a) as being unpatentable over Jin et al. (U.S. Patent 6,256,430).

Jin et al. discloses a flap (fig. 1, 10), movable between two different positions (column 1, lines 45+), having magnetic material disposed on the flap (fig 1, 11) and a force applied to the flap (column 2, lines 42+).

Jin et al. fails to disclose the magnetic material having a stepped pattern and that the applied force on the flap reduces friction.

One skilled in the art at the time the invention was made would recognize that the shape of the magnetic material would have no impact on the functionality of the material. Therefore, it would be obvious to use a magnetic material with a stepped pattern because it would merely constitute a functionality equivalent substitution of a comparable material.

Although a reduction in friction on the flap is not disclosed it would be obvious to one skilled in the art at the time the invention was made because the skilled artisan would recognize that any mechanical device reduces a portion of the friction applied to the flap.

### *Allowable Subject Matter*

Claims 1-24 are allowable.

The following is a statement of reasons for the indication of allowable subject matter:  
Although the prior art discloses a microelectromechanical apparatus having a flap it fails to teach or suggest moving the flap using an electrode disposed in one or more sidewalls.

### *Conclusion*

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

- U.S. Patent 6,360,036: discloses the use of electrodes for actuating the flap by thermal, piezoelectric, or electrostatic means.
